Dear Johan,

Thank you for your email and your comments, which we will certainly keep in mind. Yes, the collaboration with HVP will be discussed in more detail on this Wednesday's OpComm call, after which I hopefully, can provide you more details.

Best regards,

Anneliene

Dear Anneliene,

thanks for the copy. The Human Variome Project (HVP) has a similar system of pointing out useful resources. As far as I know IRDiRC recently decided to collaborate with HVP to somehow share recommended status between organisations, making it easier (less work) for the resources to get acknowledged. I think adding a few sentences on this would improve the paper. It shows vision.

Best regards,

Johan den Dunnen

Dear Members of the IRDiRC Scientific Committees,

A manuscript reviewing "IRDiRC Recognized Resources" has been prepared and submitted for publication at the European Journal of Human Genetics (EJHG), by members of the Operating Committee and the Scientific Secretariat. For your information, please find enclosed the manuscript.

Best regards,

Anneliene
