Science

our obligation

&

Contribution

to taking the challenges

Science

unifies us

brings us together!

Science

can only be done

by

collaboration

i.e.

Sharing

Sharing

is

to Share the responsibility

for the

Society

Sharing

is

to Share the responsibility

to Share the cost/risks

to Share the effort

to Share the process/experience

Sharing

is like

to **S**ail in winds and waves

We are **s**ailing

in the **s**ame boat

In the **s**ame direction

towards the **S**unshine!

Free S haring
is the rule!

“免费已成‘王道’!”

Sharing

is

to **S**hare the opportunities

to **S**hare the brilliant future

Sharing

is

to **S**hare our responsibilities
for our younger generations

Give me!

“Give me those who are younger

**Give me those
who are more bravely thinking,**

Give me those who are more devoted!

**I am responsible for
all the troubles you would make,**

**I am obligated to
find right teachers for you.”**

THE
NEW YORKER

LETTER FROM SHENZHEN

THE GENE FACTORY

B.G.I.'s leaders are aware of the perception that the company is little more than a biological data mill. The next afternoon, before leaving Boston, I attended a luncheon hosted by the company. Three hundred people filled a lecture hall that usually holds far fewer.

Most had come to hear Huanming Yang, the B.G.I. chairman, deliver a long, emotional presentation that included a PowerPoint display with ninety-one slides. Yang is warm and self-effacing, and he thanked a roster of American biologists for their help and "collaboration." In talking about the promise of genomics, he invoked Martin Luther King, Jr.'s "I Have a Dream" speech and the Declaration of Independence. It was a "Kumbaya" moment in a field where the soul is rarely mentioned. Yang referred to his company as "an unruly adolescent," and ended his talk by saying, "Please do me a favor: Take the young B.G.I.'ers as your friends, as your students. To treat them as you treated me, to teach them as you taught me. I assure you it is very rewarding. It is not only for a successful project; it is also for the brilliant future of mankind."

Enjoy Science

Enjoy Sharing

Enjoy being together with the youngsters

Enjoy the Conference

Enjoy your stay in Shenzhen

Sincere Gratitude to

All the supporters & Sponsors

All the partners & collaborators

All our friends & teaches

for

All you have done for us/me in the last decades

**Sincere Gratitude to
You All
for
Joining Us**

**Success
to
IRDiRC-2!**
